

Kennedy Mwangi

Quality Assurance Engineer | Quality Engineering | Test Automation | API & Data Validation

Nairobi, Kenya | kenmwas7@gmail.com | +254 726 156 420 | linkedin.com/in/mwangi-k-847b24295 | github.com/Kmwas

PROFESSIONAL SUMMARY

Quality Assurance Engineer with 8+ years of experience helping teams ship reliable web, mobile, API-led, and data-heavy products. Strong in risk-based test strategy, automation, API validation, SQL-backed investigation, release readiness, and clear cross-functional communication.

CORE STRENGTHS

Quality Engineering	Test strategy, risk-based testing, exploratory testing, regression, UAT, release validation
Automation	Cypress, Selenium, Appium, JavaScript/TypeScript, reusable coverage, CI/CD integration
API & Data Quality	Postman, REST APIs, SQL, database validation, reconciliation, business-rule validation
Delivery	Jira, TestRail, Git, Agile delivery, defect management, sprint planning, stakeholder communication

SELECTED EXPERIENCE

International Rescue Committee - Quality Assurance Analyst

2026 - Present

- Assure quality across data-driven products, dashboards, calculations, configuration, APIs, workflows, and release validation.
- Apply cross-layer validation to compare UI behaviour, API responses, and backend data where product risk is highest.

Nathan Digital - QA Lead

Previous

- Led QA across software products with responsibility for strategy, automation, releases, defect management, and team support.
- Worked closely with engineering and product stakeholders to plan regression, prioritize risks, and communicate release readiness.

Copia Global - Senior QA Engineer

Previous

- Delivered manual testing, automation, technical investigation, release validation, and continuous quality improvements.
- Used browser tooling, APIs, SQL, and environment comparison to isolate defects beyond the visible UI.

PORTFOLIO CASE STUDY THEMES

- Data quality: scenario-based coverage for configurable reporting logic and backend validation.
- Automation: maintainable Cypress regression coverage around high-value user journeys.
- Investigation: request/response analysis, DevTools, SQL validation, and evidence-driven defect reporting.
- Leadership: sprint QA planning, regression risk, reopened defects, release communication, and stakeholder alignment.

TOOLS

Cypress, Selenium, Appium, Postman, REST APIs, SQL, JMeter, k6, Locust, Jira, TestRail, Git, DevTools, JavaScript, TypeScript.
